

Angel, at left and above with **Volunteers Chelsea and Shanner Dillon**, is a very intelligent and agile girl. She would be a great companion for an active person or couple and would excel at agility. **Animal Care Staff member Stacey Roberts** trained Angel to jump through a hula hoop and she loves to demonstrate her trick. See her video on our Facebook page.

Angel was rescued from a high kill shelter in North Carolina by **Volunteer Pam Armstrong** who also volunteers for F.E.R.A.L. Inc., a volunteer group that rescues cats and kittens and adopts them out at the Roanoke PetsMart store.

Angel is housetrained, spayed, up to date on her vaccinations and microchipped. Now all she needs is a home. Please spread the word about this wonderful girl.

The exercise area behind the Adoption Center. The dogs and puppies enjoy their outside time. Got an hour to spare? We can always use more volunteers to walk dogs or just spend time with them.

The cats and kittens enjoy attention also.

Please come to the Adoption Center any day that we are open to begin volunteering. Once you are trained, we can use volunteer help 7 days a week. It's not sad to volunteer here because all the animals are safe and will eventually go to their forever homes.

Pappy and Pippy were turned over to the Humane Society by their owner. They were adopted together in March. As you can tell from this photo, Pappy could not bear to let Pippy out of his sight.

Hey Sandi,

Hope you and your family are doing well. You are going to cry when you see the attached picture. Gracie has changed so much. She is doing very well. We got her a sand box this weekend and hid some toys in it. She had a fun time digging. It was so much fun watching her. She would run and jump over in the sand and go to digging. She is still ringing her bell to go out and will sit and shake. She knows the down command and will jump through a hula hoop. I am working on "leave it" and "come", she did pretty well with both of those when we were out this weekend but sometimes the puppy in her still takes over.

Just wanted to let you know that she's doing well and I'm thankful every day that we have her in our life.

Take care, Cathy
