

Bogey (now Archie) was the second dog that we rescued this year that needed a leg amputation due to untreated injuries. After treatment, he went to Lucky Dog Rescue where he was adopted!

“Archie and Sadie are playing in full force! They have figured out a new game we call “steal my bone.” Archie loves to drop his bone in front of Sadie and grab it when she goes for it. Then the chase ensues! After a while we see her tearing down the hallway with it and he is close behind! They are just comical together. In one of the pics you’ll see they are actually chewing on the same piece of bone together.

Archie is truly a gift and we just adore him. He radiates joy and his spirit and silly antics make us laugh. Thanks for choosing us to adopt him.” - Jenn, Matt, & Nick
